

# Enhancing Border and Critical Infrastructure Security

## COMPANY

Persistent Sentinel LLC (PS) is a U.S. based security and surveillance Software Solutions Company with over 15 years' experience as a pioneer in designing, developing, and fielding intelligent decision support command and control software. Since its inception, PS has invested more than \$25 million in the R&D of its software products, making it a world-leader in automated security monitoring systems. PS' military and government heritage gives the company unique insights into countless overt and clandestine threats. The company is involved in all phases of a deployment; including risk assessment, design, implementation, fielding, testing, training, maintenance and support.

## CORE COMPETENCIES & DIFFERENTIATORS

- More than 15 years' experience providing cutting-edge command and control software for security and public safety operations
- Versatile technology – ability to support small single point locations, large land based facilities and international borders, electricity grids and pipelines
- Customized command and control software to meet the specific needs of the customer
- Integrates legacy security and surveillance systems, including a wide variety of sensors, cameras, and radar - reducing cost to the customer
- Provides real time information to the entire security force - enhancing ability to react
- Reduces personnel requirements - one operator can monitor and manage an integrated solution
- Proven experience translating and deploying the software into multiple languages

## PLANNING AND DESIGN SUPPORT

- System design and architecture
  - Virtual processing servers
  - Hardware requirements
- Sensor selection
  - Multiple types with detection ranges
- Sensor placement
  - SPOT™ Sensor Planning & Optimization Tool – optimal placement of cameras and radars – time and cost savings

## SAMPLE PROJECT DEPLOYMENTS

### US Army/Jordan Armed Forces (FMS)

- Prime Contractor for a Foreign Military Sales project for a large fully integrated international border security system
- More than 7 years of continuous border operations command & control software deployment and systems support

### NextEra Energy

- Security and surveillance solution for nuclear power plant in Palo, Iowa.
- Deployed HiRSA™ - an open architected command and control system that takes input from multiple sensor types
- HiRSA provides video management tools for viewing, recording and replaying video through the integrated Network Video Recorder (NVR)

### US Marine Corps Critical Area Protection

- PS developed HiRSA™ (High Resolution Situational Awareness) that combines intelligent-agent software technology with existing security system backbones to produce a fully integrated force protection system
- Deployed at forward operating base at Camp Fallujah, Iraq.
